### ***ABSTRACT***

*Advances in science and technology make the growth rate of vehicles increasing and bring a positive impact on human welfare. The increasing use of vehicles also harms the highway, such as traffic density and vehicles have a very high level of accidents so that motor vehicles become one of the human killers through traffic accidents. Descriptive research method with qualitative approach with phenomenology method. Samples in this study as many as four (4) teenagers consisting of family and Relatives This study wants to explore the phenomenon experienced by teenagers in riding motorcycles. Factors that are the cause of traffic accidents are behavioral factors, knowledge factors, road factors (facilities and infrastructure), and weather factors, where human factors become the highest factors as the cause of traffic accidents. Driving a two-wheeled vehicle needs to be supported by good driving knowledge, gar traffic order can be carried out so that road safety can be realized, in addition to the enforcement of driving standards need to be considered such as the use of helmets and driving papers.*

**Keywords:** *Safety riding, Knowledge, Behavior*

## INTRODUCTION

Safety Riding is one of the efforts made to minimize the level of danger and to maximize safety in driving to create a condition where we do not harm other motorists and are aware of the possible dangers that can occur around us and an understanding of prevention and unemployment.

Advances in science and technology make the growth rate of vehicles increasing and bring a positive impact on human welfare. The increasing use of vehicles also harms the highway, such as traffic density and vehicles have a significant rate of occurrence of accidents are very high so that motor vehicles become one of the human killers through traffic accidents. (Heryono, Maslina and Zainul, 2020)

World Health Organization (WHO) revealed that 48% of the victims who died in traffic accidents were people aged 15-44 years. Data from the Central Bureau of Statistics (2015) shows that the most number of motorcycle accidents is 98.88 million units or 81.5%. Indonesia became the third country in Asia with a total of 38,279 traffic accident deaths in 2015. (Hendrawan, 2019)

Who in the Global Status Report on Road Safety (2015) reported that the highest incidence of deaths from motorcycle accidents occurred in Southeast Asian countries and the Asia Pacific countries where the value of each was 34% (WHO,2015, in (Permatasari, 2018). The Director-General of Land Transportation revealed that in Indonesia motorcycle accidents in 2013 still ranked the highest at 119,560 incidents. (Permatasari, 2018)

Some factors that cause traffic accidents are human factors (human), vehicle factors, road factors (facilities and infrastructure), and weather factors, where human factors become the highest factors as the cause of traffic accidents (Manurung & Jefri Rio, 2010). Driving a two-wheeled vehicle needs to be supported by good driving knowledge, gar traffic order can be carried out so that road safety can be realized, in addition to the enforcement of driving standards need to be considered such as the use of helmets and driving papers. (Heryono, Maslina and Zainul, 2020)

Based on initial observations and interviews conducted on teenagers, said to understand about safety riding such as having a driver's license and registration, and memorize about the signs that are on the highway. Aims to know the picture of safety riding in adolescents about the negative-positive impact on remedy knowledge about safety riding and to know which teenagers who have not done safety riding are driving. The benefits of knowing teenagers can know about safe riding and can prevent traffic accidents. . This research was conducted on June 15, 2021 – June 21, 2021. Where the respondent is a teenager who already has a driver's license. Penelitian aims to see teenager's behavior in doing safety riding while driving.

## METHODS

This research uses a qualitative research method with a phenology approach. The data retrieval stemmed from an in-depth interview that was later copied in the form of words on four

different informant classes. Source triangulation design approach is done on four informants to know the description of safety riding knowledge on remedy. The data collected in this study are respondents' characteristics, knowledge, attitudes, and behaviors. Variables in this study include free variables such as knowledge about safety riding, attitudes, and behaviors. The bound variable is safety riding. Informants of this study are teenagers who have had their driver's licenses selected by *purposive sampling*.

motorists to always put safety in driving?	<p>than later why</p> <p>2. Always obey the signs or regulations that exist because it is for yourself not others, as long as obeying the journey will be peaceful and peaceful</p> <p>3. Never change and always follow all the rules</p> <p>4. Always obey the signs or regulations that exist because it is for yourself not others, as long as obeying the journey will be peaceful and peaceful</p>	<p>umbrellas before it rains</p> <p>2. Always comply with traffic rules and signs</p> <p>3. Don't change and always comply with traffic regulations</p> <p>4. Always obey traffic signs</p>	<p>happens</p> <p>2. Comply with the rules</p> <p>3. Comply with the rules</p> <p>4. Comply with the rules</p>	<p>respondents' understanding of driving safety</p>	
16. Do you always pray before driving to avoid accidents?	<p>1. Sometimes it's not</p> <p>2. Always pray</p> <p>3. Always pray</p> <p>4. Pray every time you travel anywhere.</p>	<p>1. infrequently</p> <p>2. always</p> <p>3. always</p> <p>4. always</p>	<p>Always pray</p>	<p>Respondents' understanding of safety and whatever is done has been regulated by ALLAH SWT has been very good</p>	<p>Knowledge and religion</p>

Safety Riding behavior in this petition includes several things that greatly affect the safety of driving, including driving using safety equipment such as (helmets, gloves, masks), complete the letters in driving, always pray before driving. The results of the study showed that safety riding behavior conducted by respondents such as using personal protective equipment while driving is always the most important. "Use PPE to drive and obey traffic signs".

A person's knowledge of objects has different intensities or levels. Broadly divided into six levels of knowledge namely know, understand, application, analysis, synthesis, and evaluation. Knowledge plays an important role in a job, especially knowledge about safety riding in motorcyclists. Someone who has more knowledge will tend to be careful in doing something. For example, riders who have more knowledge about safety riding when riding a motorcycle will work more carefully compared to workers who do not know about good safety riding, so it can be concluded that motorcyclists who have good safety riding knowledge will comply with traffic regulations and always apply safe driving behavior both themselves and other road users.

## CONCLUSION AND SUGGESTIONS

Safety Riding is one of the efforts made to minimize the level of danger and to maximize safety in driving to create a condition where we do not endanger other drivers and are aware of possible dangers that can occur around us and an understanding of prevention and mitigation. The factors that influence it are behavior, and knowledge.

As obedient citizens we should always follow the rules by the local government because this is a reflection of being nice and diligent citizens, good behavior when driving needs to be done for all teenagers who want to go somewhere and don't forget use full driving outfits like helmet and jacket is a simple thing you must follow, last but not least, a brilliant person is always follow what things that can make you a better person not too hard to follow when you drive, it just you must be a kind of person who does a transport and do not forget license thing you must bring on your pocket or wallet.
